Sidney Powell, a lawyer for Trump in the lawsuits to end non-existent voter fraud, has claimed without evidence that various communists, foreign groups and yes, even Hugo Chavez, deceased since 2013, are all responsible for hacking Dominion Voting Systems. The idea is that this electronic voting system, Dominion, was responsible for flipping millions, yes millions, of votes from Trump to Biden. Apparently, these systems were made in China, although so is your iPhone that you used to look that up; but the fact is, there is no evidence. Tucker has had enough and said he called Sidney to ask for evidence, was given none, she declined to go on his show and when pressed, told him to stop contacting her. Why? Well, she doesn't have any evidence.

> "The Dominion Voting Systems, the Smartmatic technology software, and the software that goes in other computerized voting systems here as well, not just Dominion, were created in Venezuela at the direction of Hugo Chavez," Powell declared.

These people are simply insane. Powell perhaps meant Maduro, but is too dumb to know the current President of Venezuela and that Chavez has been dead since 2013. Tucker will probably get attacked by the riggers (maga people who think th election was rigged for Biden) who have been out chanting the Fox News

sucks, but always chanting Tucker's name. Guys, the gig is up. Just concede for the good of my boredom, which is at an all time high.
